Pre-mortem

Feza Anaise Umutoni, Pravesh Agarwal, Zach Shunnarah

Team Organization

- Lack of communication with THRIVE representatives
- Not compiling everything in one place (not updating project wiki/google drive)

Data Collection

- Inaccurate data/difficulty obtaining specific inventory data e.g utility poles, number of households etc.

Outcome

- Problem making a user-friendly database
- Project solution doesn't contribute much to the problem
- Lack of public facing tool

Progress

- Insufficient time to collect the necessary data, in terms of curating, cleaning and analyzing
- Side tracking --- focusing too much on data already compiled vs specific asset
